Waste transport

We turn waste into
resources while protecting
the environment.

Sogliano Ambiente Trasporti

Safe transporting of waste

Since 1996 Sogliano Ambiente has been setting the benchmark for transforming the problem of waste into an opportunity **for growth and economic development.** To guarantee correct, safe management of

urban and special waste transport to and from the treatment, recovery and disposal facilities, Sogliano Ambiente has set up a subsidiary company, **Sogliano Ambiente Trasporti.**

Operative Structure

Resources	Function
2	Management and organization
5	Drivers
5	Tractor units
8	Semitrailers (walking floor, cisterns)

To meet the widest range of transport requirements, Sogliano Ambiente Trasporti also uses approved contractors.

Value added services

- Logistics and transport of waste to and from treatment, recovery and disposal facilities.
- Transport of leachate from the landfills served to final purification facilities.
- Coordination of the operations involved in the movement of waste within the plants.
